

Powering the

COMPANY OVERVIEW

Connexr is an Enterprise Solutions Partner (MSP) dedicated to accelerating Industry 4.0 adoption. We partner with global manufacturers to integrate OT and IT, enabling smart factories that are connected and autonomous.

From retrofitting legacy equipment with IoT sensors for predictive maintenance to creating high-fidelity digital twins for virtual commissioning, we take ownership of your digital transformation, delivering operational resiliency.

KEY DIFFERENTIATORS

- OT/IT Convergence
- Digital Twin Simulation
- Managed IoT Operations
- Predictive Maintenance

REPRESENTATIVE PROJECTS

INDUSTRY 4.0

SMART FACTORY

Predictive Maintenance

CHALLENGE

Reactive maintenance & unplanned downtime.

SOLUTION

IoT Sensor instrumentation & Edge Processing.

Outcome

40% Less Downtime

SIMULATION

VIRTUAL COMM.

Digital Twin Platform

CHALLENGE

Expensive prototyping & long commissioning.

SOLUTION

Physics-based 3D Digital Twin simulation.

Outcome

30% Throughput

CORE SERVICES

- Predictive Maintenance**
IoT sensor integration.
- Digital Twin**
Virtual commissioning.
- Edge Analytics**
Real-time processing.
- OT/IT Integration**
SCADA & ERP connection.
- Industrial Cyber Sec**
Securing OT assets.

WHY CONNEXR?

- Manufacturing DNA**
Deep shop floor understanding.
- Operational Outcomes**
OEE, Takt Time, Yield metrics.
- Long-Term Reliability**
Sustaining critical assets.
- Scalable Innovation**
Multi-factory rollouts.
