

Engineering Connected

COMPANY OVERVIEW

Connexr is an Enterprise Managed Solutions Partner (MSP) specialized in transportation and logistics. We help airlines, freight forwarders, and logistics providers optimize global networks through predictive intelligence.

From engineering real-time fleet maintenance platforms that reduce AOG time to deploying AI-driven crew recovery engines, we take ownership of mission-critical systems to ensure operational continuity.

KEY DIFFERENTIATORS

-  **Operational Continuity**
-  **Aviation & Logistics DNA**
-  **Managed Fleet Systems**
-  **Predictive AI Ops**

REPRESENTATIVE PROJECTS

ASSET MANAGEMENT

AI OPS

Predictive Fleet Intel

CHALLENGE

Reactive maintenance causing costly delays.

SOLUTION

Predictive Failure Modeling & Real-time ingestion.

Outcome

40% Less Downtime

OPERATIONS

OPTIMIZATION

Airline Crew Recovery

CHALLENGE

Weather creating chaos & flight cancellations.

SOLUTION

AI Optimization Engine for automated plans.

Outcome

60% Faster Recovery

CORE SERVICES

-  **Predictive Fleet Maintenance**
Real-time AI failure prediction.
-  **Intelligent Crew Recovery**
Automated disruption handling.
-  **Logistics Network Opt.**
Route planning algorithms.
-  **Smart Cargo Tracking**
IoT-enabled asset visibility.
-  **Legacy Modernization**
Mainframe to cloud migration.

WHY CONNEXR?

-  **Mission-Critical Reliability**
Design for zero-downtime environments.
-  **Real-Time Engineering**
Event-driven architecture expertise.
-  **Global Scale**
Supporting continental logistics networks.
-  **Regulatory Compliance**
Built-in aviation safety adherence.
